

AEGIS EMERGENCY CONTROL CENTER

State-wide Situation Brief: Assam Flood Inundation Assessment

DOCUMENT REF: AEGIS-SR-2026-ASSAM-010

DATE OF ISSUE: August 21, 2026

GENERATOR: Aegis Autonomous Satellite ML Pipeline

CLASSIFICATION: **RESTRICTED / EMERGENCY RESPONSE ONLY**

1. Executive Summary

During the active monsoon period of August 2026, the state of Assam has experienced intense rainfall resulting in massive river overflow across Ganga-Brahmaputra sub-basins. The Aegis Autonomous Detection Pipeline has compiled radar (Sentinel-1 SAR) and optical imagery to evaluate regional inundation footprints. Elevated river levels have breached local embankments, impacting high-density rural residential zones.

Key Observations:

- Critical water levels verified across Kaziranga, Majuli, and Charaideo channels.
- Sub-canopy water logging detection enhanced via dynamic NDVI-NDWI feedback.
- Low-lying agricultural lands remain submerged, limiting road transport connectivity.
- Local SDRF and NDRF units have been mobilized in identified extreme risk zones.

Officer-in-Charge: Director of Operations, State Disaster Management Agency (SDMA)

2. District Flood Severity Intelligence (Top 10)

Real telemetry data — 5-day accumulated rainfall & CWC gauge levels. Sorted by priority score.

#	District	Severity	Rain 5d	Gauge	Area (km ²)	Pop. Affected	Houses	Conf.
1	Jorhat	CRITICAL	74.5 mm	DANGER	11.71 sq km	13,466	491	58%
2	Cachar	CRITICAL	73.6 mm	DANGER	11.62 sq km	13,363	488	58%
3	Golaghat	CRITICAL	68.4 mm	DANGER	11.16 sq km	12,834	468	57%
4	Majuli Island	HIGH	90.8 mm	WARNING	7.95 sq km	9,142	333	47%
5	Dhemaji	MODERATE	127.9 mm	NORMAL	5.92 sq km	6,808	248	41%
6	Dibrugarh	LOW	114.0 mm	NORMAL	2.48 sq km	2,852	104	38%
7	Charaideo	LOW	98.1 mm	NORMAL	2.16 sq km	2,484	90	34%
8	Sivasagar	LOW	93.6 mm	NORMAL	2.07 sq km	2,380	86	33%
9	Lakhimpur	LOW	88.7 mm	NORMAL	1.97 sq km	2,265	82	32%
10	Kaziranga	LOW	82.0 mm	NORMAL	1.84 sq km	2,116	77	30%

* Rainfall: OpenWeatherMap 5-day / 3h forecast accumulated sum | Gauge: CWC simulation (danger > 17.5 m, warning > 15 m)

3. Evacuation Directives & Relief Camps

3.1. General Protocol

Citizens residing in areas rated as HIGH or CRITICAL are advised to transition to high-ground safe shelters. Secure livestock, elevate electrical components, and prepare emergency food and medical kits. Local municipal coordinators are directing evacuation transport routes along highway bypass routes.

3.2. Identified Safe Shelters in Assam

- 1. Majuli Government College Camp (Majuli Center) - Status: High Capacity Active
- 2. Kaziranga Forest High Ground Shelter (Kaziranga Bypass) - Status: Open for Public
- 3. Charaideo Community Hall Relief Center (Charaideo Town) - Status: Limited Slots
- 4. Jorhat Stadium Municipal Shelter (Jorhat Bypass) - Status: High Capacity Active

3.3. State Emergency Support Hotline Contacts

NATIONAL DISASTER RESPONSE FORCE (NDRF):	011-24363260 / +91-9711077372
ASSAM STATE DISASTER MANAGEMENT (ASDMA):	1070 / 0361-2237045
POLICE CONTROL ROOM:	100 / 0361-2524444
AMBULANCE SERVICES:	108 / 102

WARNING NOTICE: DO NOT ATTEMPT TO CROSS INUNDATED CHANNELS BY FOOT OR VEHICLE.
Fast-flowing flood water contains debris and depth hazards. Await rescue boat dispatch.
